

# Shopify integration

08/25/2023 9:05 am PDT

Heylo can integrate with [Shopify](#) to make the buying experience seamless for members and painless for admins. For example, Heylo can pass your paid member information automatically to your Shopify store, or your sponsor, and instantaneously offer discounts to paid members. If a member cancels, Heylo will automatically remove the discount.

[Learn how to set up the integration in 60 seconds](#)

Member emails are automatically created in the linked Shopify store (or, automatically updated if their contact already exists). They are allocated the appropriate tags to verify store discounts to members. If a member cancels, their tag is removed but their information remains.

No more copying and pasting from CSV exports... Heylo alleviates the admin work and enables members to get timely access to all the benefits associated with joining the group.

Please complete [this form](#) to set up your integration.
